

# Twintec Cable TT4550S

When the areas to be cleaned get a little bigger, and quite often the time available gets a little shorter, this is the moment when practical innovation comes into its own.

With plenty of surplus power available within the standard motor and transmission design we have been able to enlarge the brush size and increase the operating efficiency whilst still maintaining a machine that is exceptionally easy to use.

Water capacity is up by 33% and the cleaning path by 20% over the 3450 size and yet to use the machine you would never know.

The 4550 has all the classic practical features of the smaller machines with its full stainless steel chassis, heavy duty motor and gearbox, powerful

'Twinflo' suction system, polyform water tanks, efficient semi-parabolic, polyurethane collection system and fully adjustable operating handle and control centre.

*Rugged, hardworking, effective and thoroughly reliable ... this is the result of years of experience and it shows.*

Brush Motor	Vac Motor	Power	Diameter	Speed	Capacity	Range	Weight	Size
1000W	1200W	230V AC 50Hz	550mm	50Hz=150rpm 60Hz=180rpm	40L	42m	68Kg	1150 x 1110 x 850mm

Also available in 115V/120V specification. Photographs may include extra items for illustration purposes only.
