

Manufactured in Japan, Sarp offer a wide range of brushcutters suitable for both domestic and commercial applications; from the lightweight VS270S, designed for the larger property, to the heavy duty VS500T, which will

cope with the heaviest of tasks.

Utilising the latest Honda 4 stroke engines and Kawasaki 2 stroke engines these machines can be fitted with a choice of a nylon line head or steel blade, depending on the application.

All models are shaft driven with anti-vibration mountings, and come complete with harness, goggles, metal blade,

nylon line head and tool kit.
