

Speed ramps offer an effective solution to the problem of slowing down 'onsite traffic' on private roads or sites.

Supplied in 50 cm long modular segments, in either yellow or black they are manufactured in heavy duty recycled PVC segments.

Available in two heights, 5 cm or 7 cm, the latter requiring traffic to slow down to a greater degree. End caps can also be fitted at the end of each single run of ramp section. These are supplied in pairs, each being 25 cm long.

All ramp sections have integral 'cats eyes' for extra visibility.

7.0cm SPEED RAMP

- 50cm wide, 7cm high
- Recommended speed 5mph

5.0cm SPEED RAMP

- 40cm wide, 5.0cm high
- Recommended speed 10mph
