

Apollo Model 725 HVLP Turbine Systems

The Apollo Model 725 gives impeccable results when spraying thin solventbased materials such as: enamels, stains, lacquers, polyurethanes and more. This model is ideally suited for restoring porcelain, fiberglass, countertops, ceramic tile, appliances and cabinets. The flawless finish makes them look as good as or better than new.

This turbine comes equipped with the Handi-Hold™ Spray Gun Docking Station, Apollo's newest innovation. Store, hold or transport your spray gun in a vertical position with no risk of knocking or falling over. Ready to spray when you are.

This unit is equipped with an internal air relief valve to accommodate a non-bleed style turbine spray gun.

The turbine comes supplied with 14 foot flex air hose.

Specifications:

- 2 Stage
- 4.5 PSI (.31 bar)
- 112 CFM
- Dual Air Filtration
- HVLP Only - Single Spray Gun
- 110VAC - 60HZ
