

CLIPPER CHW MODULO

The **Clipper CHW Modulo** is a lightweight, modular masonry saw designed for the on-site cutting of bricks, tiles, paving slabs and similar building materials. The CHW is made from interchangeable extruded aluminium profiles, resulting in a high strength/performance machine at low weight. The CHW features a 2.2kw direct drive motor, which can be run via a 3 KVA transformer or 13 amp domestic supply.

- Foldable legs for increased working stability and ease of transportation.
- Aluminium frame - very rigid construction, rust proof, maintenance free.
- Lockable conveyor cart with non-slip surface and anti-tilt device.
- Electric motor fitted with NVR starter overload protection.
- Recirculating water feed system permitting dust free operation.
- Removable rust proof water tray for easy cleaning.
- Available in 110 or 220V electric.

TECHNICAL DATA

MAX BLADE CAPACITY	350MM
BORE SIZE	25.4MM
MAX DEPTH OF CUT	110MM
MAX CUTTING LENGTH	600MM
NO LOAD SPEED	3000RPM
WEIGHT	81KGS
HEIGHT	1350MM
LENGTH	1195MM
WIDTH	705MM
NOISE LEVELS	73/87dB(A)
