

## Technical Data

Dimensions (LxWxH)	195 x 90 x 75 mm
Width	90 mm
Remark about max. detection range for object localization	, depending on selected base material mode, base material condition (damp or dry), object class and spacing
Max. detection range for object localization	120 mm , depending on selected base material mode, base material condition (damp or dry), object class and spacing
Minimum distance between two neighbouring objects	40 mm
Maximum depth for object class indication	60 mm
Materials detected	Metal, wood, plastic, live wire
Localization accuracy	±5 mm
Battery type	4 x 1.5 V (AA)
Accuracy of depth indication	±10 mm , depending on base material condition (damp or dry) and object class
Disclaimer	Detection performance depends greatly on condition of base material
Battery life (alkaline)	5 h
Weight with batteries	700 g
Operating Temperature Range	-10 - 50 °C
IP protection class	IP 54
Package Contents	PS 38 with PSA 67 toolbag, PUA 70 marker set, PDA 60 hand strap, 4 x AA batteries, producer certificate, operating instructions. Supplied in an impact-resistant plastic tool case.
Lifetime Service	2 years
