

Weldmaker

150SP

Features

- **Welds 4.0mm Electrodes**
- **Smooth welding Characteristics**
- **Auto Idle**
- **Compact Design - Weighs just 55Kg**
- **110V Auxiliary Output**
- **Easy maintenance highly portable**
- **Rugged Construction**

The 150SP is a highly portable compact welder/generator providing excellent welding characteristics for all types of DC manual metal arc electrodes. The proven high performance alternator enables welding to be carried out with 2.5mm to 4.0mm electrodes.

Auxiliary power output is 110V AC 1.5kW with a frequency switch to change from 50Hz to 60Hz when required.

Weighing only 55kg, the machine is protected by a strong cradle frame, with two wheel trolley optionally available.

Auto-idle is fitted as standard to reduce operating noise and fuel consumption. The machine is also fitted with auto shutdown in the event of low oil pressure.

The Proven Honda petrol engine directly coupled to the welding alternator ensures total reliability and the machine fully complies with the latest EMC and CE regulations.
